

CORPORATE PORTFOLIO

THE NAME YOU TRUST

About us

Vintron Smartvision Private Limited is headquartered in New Delhi, India. It is a leading manufacturer of electronic security and surveillance products in India. Founded in 1991, Vintron commenced its operations by manufacturing of Desktop PC, Motherboards & Monitors. Subsequently, Vintron expanded its operation to various sub-segments of electronics. Vintron has a pedigree of 35 years of successfully serving the Indian customers with innovation, responsiveness and trust.

Vintron is registered in the Indian Government's "Make in India" programme & all the products sold by Vintron are indigenously manufactured in our state-of-art manufacturing facility located at Okhla, New Delhi.

In a market majorly flooded with cheap Chinese electronic products, Vintron has made a strong standing of its own, as being a reliable & truly Indian made brand. Vintron products pass stringent quality control tests and carry international certifications such as CE, FCC, ROHS, etc.

Apart from strong manufacturing capabilities, Vintron has pan-India presence in the form of dedicated channel & offers extensive range of electronic security and surveillance products ranging from Analog cameras, high definition IP camera and speed domes to DVRs, NVRs, Mobile DVRs, POE Switches, Smart home automation cameras and more.

PROUDLY

Since the manufacturing is done indigenously the product range and models can be diverse and modified as and when required to match customer's requirements.

Vintron India's leading CCTV brand began producing surveillance devices locally in India in its manufacturing facility in Okhla, New Delhi 35 years ago. And since then, the brand has enhanced its manufacturing capabilities to reach a production capacity of 60-70K units a month.

Vintron's manufacturing facility is registered under the Prime Minister's "Make in India" initiative which encourages businesses to manufacture indigenously. The facility is equipped with world class technology and latest state of the art machines. The facility also has its own dedicated R&D and Testing Center, to facilitate product development and ensure stringent quality standards.

With over 100 experienced Engineers and Technicians employed at the facility, the facility currently has a capacity to make 60,000-70,000 security cameras per month.
